

Connecting to Kwantlen's Secure Wi-Fi with BlackBerry

Note: These screenshots were taken with a BlackBerry Curve 9300, running BlackBerry OS 6.3. The interface may look slightly different on other devices and versions of the operating system.

1. Press the menu key (). In the menu, select **Manage Connections**.

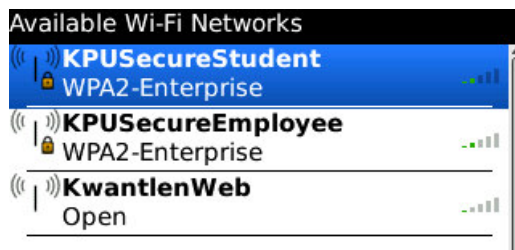

2. Turn Wi-Fi on. Select **Set Up Wi-Fi Network**.

3. Select **Scan For Networks**.

4. **Students:** Select **KPUSecureStudent**

Employees: Select **KPUSecureEmployee**

5. **Students:** Enter your **student number** and **PIN** as your username and password.

Employees: Enter your **username** and **password**.

6. Select **Entrust.net SecureServer CA** as the CA certificate. Press **Connect** and you will be connected to Kwantlen's secure wi-fi network.
